Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Seto et al. (5,560,888). Seto teaches an incubator for a biochemical apparatus. The device is best shown in Figures 4, 5 and 13. It includes upper block (61), lower block (45), heater (48) which contacts both blocks, and cover (46) with insulating materials (51 and 52) having a recess (opening #59). The upper block and lower block are brought into contact to hold and incubate an analysis slide. The Examiner considers the optical element (16) to be a potential measuring probe next to the block.

Art Unit: 1743

4. Claims 1-4, 6, 8 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Arai et al. (5,496,518). Arai teaches an incubator for a biochemical apparatus. The device is best shown in Figures 4 and 5. It includes upper block (61), lower block (45), two heating elements (48 and 57), and cover (46) with insulating materials (51). The upper block and lower block are brought into contact to hold and incubate an analysis slide. The Examiner considers the optical element (16) to be a potential measuring probe next to the block.

5. Claims 1-4 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugaya (4,814,279). Sugaya teaches an incubator comprised of two blocks – one of which is movable towards the other. The examiner presumes the heater element is present in one of the blocks as disclosed in column 2, line 11.

6. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Handique (6,692,700). Handique teaches a microfluidic device comprised of first and second blocks that are brought into contact. A heater is provided in the lower block.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seto et al. (5,876,669 and 5,753,184) show further examples of slide incubators.

Art Unit: 1743
